SUMMARY

Technical product builder with 6+ years of experience shipping consumer products at Meta, Microsoft, and early-stage teams. Experienced in 0-to-1 product development, product strategy, experimentation, ranking systems, user-centered design, and cross-functional execution. Combines engineering depth with hands-on product and design experience across large-scale platforms and independently launched digital and physical products.

SKILLS & TOOLS

Product: Product Strategy · 0-to-1 Development · Roadmapping · Experimentation / A/B Testing
Research: User Research · Market Research · Usability Testing · Rapid Prototyping · Product Analytics
Leadership: Cross-Functional Collaboration · Technical Product Execution · Stakeholder Communication
Platforms: Firebase · Node.js · Django · Next.js · Xcode · Android Studio · Git

Design: Product Design · UX/UI · Interaction Design · Information Architecture · Wireframing
Design Tools: Figma · FigJam · Procreate · Illustrator · Photoshop · Sketch · Adobe XD
Engineering: Python · C++ · C# · Java · Swift · JavaScript / TypeScript · React · React Native
Creative: Visual Design · Design Systems · Brand Identity · Adobe Creative Suite

EXPERIENCE

Meta, Menlo Park, CA - Software Engineer

MARCH 2024 - PRESENT

- Owned ads product initiatives that drove a 0.19% revenue gain across two halves; developed product-ranking strategies, leading from hypothesis design and experimentation through technical architecture and execution with the London Data Science team.
- Built a 0-to-1 Messenger Stories product on a small, startup-like cross-functional team, collaborating across functions to develop the new product's backend and iOS experiences from the ground up.
- Led improvements to org-wide A/B testing by identifying workflow gaps and building tooling, dashboards, and documentation to streamline product decision-making.

Microsoft, Redmond, WA - Software Engineer, Xbox

AUGUST 2020 - FEBRUARY 2023

- Partnered with Product and Design to scope, develop, and ship a revamped Xbox Search experience across UX and Search API, contributing to a 30% increase in engagement and retention after release.
- Developed customer-facing experiences across Cloud Gaming, Search, Home, Collection, memory management, and accessibility, serving 120M monthly Xbox users.
- Translated product requirements and UX goals into technical solutions across C++, C#, and XAML while collaborating across engineering, product, and design from planning through launch.

Finery, New York, NY - Full-Stack Software Engineer

FEBRUARY 2023 - JUNE 2023

- Helped shape and build an early-stage social investing product across web and mobile as part of a 6-person team.
- Designed and shipped market news, chat threads, and ticker-specific tagging features, contributing to 22% user acquisition growth over three months.

SELECTED PRODUCT & DESIGN PROJECTS

Opal - Product Designer & Developer | 2026

Designed a desktop workspace connecting meeting transcription, decisions, tasks, projects, and cross-functional collaboration. Defined information architecture and end-to-end flows, created wireframes and a visual system in Figma, and translated the design into a working Next.js prototype.

Yuugen Apparel - Founder & Designer | 2020-2021

Founded an independent streetwear brand from research and brand identity through production and launch. Created original artwork and product mockups, iterated with suppliers, conducted customer and market research, and generated 1,000+ sales through Shopify, Etsy, and Instagram.

Creative AI Writing Platform - Product & Engineering

Built an AI creative-writing experience combining user prompts, GPT-3.5, and Stable Diffusion; owned the interaction concept and end-to-end implementation using OpenAI API, Python/Flask, and web technologies.

EDUCATION

University of California, Berkeley - B.S. Computer Science | 2016-2020

Coursework: HCI Design · Artificial Intelligence · Data Structures & Algorithms · Functional Programming
